Bergenia omeiensis 'Snow Chimes' COPF

Bergenia omeiensis 'Snow Chimes' COPF

Height : 40-50 cm (16-20") USDA Zone : 6

Landscape use: Solitary or Mass planting.

This most attractive hardy evergreen perennial selected by a member of Piroche Plants at a high elevation on Mt. Omei has thick flat bright green leaves and produces panicles of large long-lasting pure white nodding flowers in profusion that eventually turn light pink. Originally *Bergenia omeiensis* was discovered in China in the 1970s growing in damp, shady places in the forests and ravines of Mt. Omei in Sichuan province, China. Our selection is heat tolerant and hardy to Zone 6.

Require semi-shade, well-drained organic soils and adequate moisture.

Introduced by Piroche Plants, 1998. (China)
